

Instructions, part 2:

9. Apply glue to the gray area marked "glue body #2 here" and place body #2 over it. Be sure to line up the tops of both heads so that they are even. Press firmly and let the glue dry.

10. Take arm #2 and slide it hand-first through the slot in body #2. Apply a dab of glue to the gray area marked "glue arm #2 here." Line up the bottom point of arm #2 with the grey area. Press firmly and let the glue dry.

11. To personalize the pop-up, print or photocopy photographs of two people so that their faces are roughly the same size or a bit larger than the circular heads of the body pieces. If you would like one "person" to be kissing the other, for one face, use a photo of someone puckering up and looking to the left. Cut out faces.

12. Choose one face (not a profile) to be framed inside the heart when the card is closed. Glue down over head of body #1. Glue second face over head of body #2.

13. Decorate the card using scraps of cardstock to make trim and other shapes for the front and inside of the card.
