

# TEMPLATE

1. Print template on a color inkjet printer. Enlarge on a color photocopier at 120%.

2. Accordion-fold at hash marks, making sharp creases with a bone folder or your hands. Staple once through the folded center at the staple mark, and trim off the white edges. Cut off the corners where indicated.

3. Fan out the accordion into a circle, and tape the backs of the top ends together. Slip the top of a garden marker between bottom ends of the fan, and glue. Secure with a binder clip while drying.
