TEMPLATE

FOUNDATION PIECES: LACE PATTERN

INSTRUCTIONS:

Using ink-jet printer transfer paper, print out 3 sheets of the lace design. Cut around the edges of the lace design. Practice ironing the transfer according to the paper instructions – using a scrap of paper so you are comfortable with the length of time it takes to make the image transfer. Line up the lace pattern on both sides of the shirt placket, making sure to match the pattern repeat where necessary and iron.
